Data availability

All code, cached model outputs and scripts required to reproduce every number and figure are publicly available at <https://github.com/vinhqdang/WAGER>. This URL is withheld from the anonymized manuscript and will appear in the published version.

CRediT author contributions

Quang-Vinh Dang: Conceptualization; Methodology; Formal analysis; Software; Investigation; Validation; Visualization; Writing – original draft; Writing – review and editing.

Declaration of competing interests

The author declares no competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

Funding

This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.

*Corresponding author.

Declaration of generative AI and AI-assisted technologies in the manuscript preparation process

During the preparation of this work the author used a large language model assistant in order to help draft and edit prose, write experiment and figure scripts, and check numerical consistency between reported values and stored result files. After using this tool the author reviewed and edited the content as needed and takes full responsibility for the content of the published article.

Acknowledgements

None.
